Re: Advent Systems Inc.

To whom it may concern:

Please allow me to introduce myself, My name is AK Greenwood and I served with the Ogden City Police Department and retired as Chief of Police after 32 years. I then was appointed Chief Deputy of the Weber County Sheriff's office where I served for another 6 years. I am presently serving as the Chairman of the Ogden City Civil Service Commission and am excited to write this letter recommending Advent Systems and their staff of highly qualified consultants and technicians. I would also like to include in this recommendation the name of Dr. Steve Rogers, who I have known and worked with on many criminal investigations over the past 30 years. He is a man of great integrity and much experience in the security field.

I have had the opportunity of working with many security companies and various types of security equipment both in the police and jail environment. In my opinion Advent Systems is the leader in ultra high-quality Digital Video Surveillance technology.

Advent's technology is far superior to other systems that I have used and seen on the market. Their system has some unique and advanced technologies. Its compression allows for easy long term storage and live remote viewing. I have also seen their system and the ability they have to view up to 48 cameras at a time. I have also had the opportunity to dial into one of their demo sights and have witnessed first hand the live remote viewing and the quality is absolutely incredible.

My interaction with Dr. Rogers and the rest of the Management Team of Advent has proven to me that they are not only very qualified, but that they have established a world class organization that you can rely on. They are staffed with people who understand Security and Surveillance through their real world hands on experience. They operate at a different level of first hand knowledge and real life experience that can be used in serving their clients.

I would recommend Advent's Technology and its Management Team to any organization or entity that is looking for top of the line, world class surveillance technology and eminantly qualified people to help design your system and back it up.

Always remember that quality surveillance equipment doesn't cost, it saves investigation time and provides good clear quality pictures from which identification of offenders can be identified. An unclear grainy picture is worthless in court.
