To Whom It May Concern:

At the beginning of the 2006-2007 school year we purchased a ten camera digital video security system from Advent Systems, Inc. The installation was completed on time and according to our specifications. We appreciated the professionalism and cordial manner of their installation team. They were very easy to work with! As we have had questions or have needed to make adjustments, we have also found their employees to be very quick to return phone calls and to provide a high standard of technical support. The system has exceeded our expectations. Within days of the system's installation, we were able to address and correct a major issue in the school. We feel that the system more than paid for itself with the correction of that problem. Subsequently, we have successfully resolved several locker thefts and other issues. The system has been most useful to us at Snowcrest Junior High in controlling bullying and hazing at school. Although this is a very fine school with wonderful students, we still have occasional issues with bullying behavior. Thus far, our records indicate that student behavior has improved dramatically in this regard. We feel that the system has been an effective deterrent to the negativity associated with bullying and is helping us maintain a more positive educational environment for our students.

I have been very pleased to work with this company and its representatives. I generally do not officially recommend specific companies or products. My experience with Advent and with their product and service has been so positive that I am very comfortable making this exception. As funds allow, we plan to expand the system in the future. If you have additional questions, please feel free to contact me at (*# removed*).

Respectfully,

Dr. Richard L. Rhees
